PROFESSIONAL SUMMARY

Results-driven MCA candidate with hands-on expertise in **Cloud Infrastructure**, **AWS** (EC2, S3, IAM, VPC, CloudWatch, Lambda), **Terraform**, and **Docker/Kubernetes** containerization. Proficient in **Linux Administration**, CI/CD Pipeline automation, Infrastructure as Code, and Cloud Operations — proven track record deploying scalable, monitored cloud environments. Experienced in container orchestration, Ansible automation, cloud monitoring with CloudWatch, and enforcing AWS Cloud Security best practices. Targeting Cloud Engineer, AWS Cloud Operations, Platform Engineering, and Infrastructure roles to drive reliable, automated cloud deployments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch, Lambda, DynamoDB)

IaC & Automation: Terraform (Modules, Variables, Outputs, Data Sources), Ansible, Jenkins, Infrastructure as Code (IaC), CI/CD Pipelines, Deployment Automation

Containerisation & Orchestration: Docker, Kubernetes, Kind, Container Orchestration, Microservices Architecture

OS & Scripting: Linux (Ubuntu, CentOS, RHEL), Bash/Shell Scripting, Python

Networking & Security: TCP/IP, DNS, HTTP/HTTPS, NGINX, Load Balancing, Reverse Proxy, AWS Security Groups, IAM Policies

Monitoring & Observability: Amazon CloudWatch, PM2, Infrastructure Monitoring, Log Monitoring, Alerting

Version Control & Tools: Git, GitHub, Jira, Confluence

EXPERIENCE

Data Analysis Intern

Jun 2025 – Jul 2025

Main Flow Services and Technologies Pvt. Ltd.

Gurugram, India

- Optimised data retrieval via complex SQL queries, extracting actionable insights from large datasets for stakeholder reporting.
- Documented analytical pipelines and data configurations; maintained structured operational records aligned with team sprint cycles.

PROJECTS

Automated Infrastructure Deployment Pipeline | Jenkins, Ansible, Bash, Git, Linux

[GitHub](#)

- Built end-to-end CI/CD pipeline on Linux with Jenkins & Ansible, cutting deployment time from 20 min to under 2 min across virtualised nodes.
- Authored idempotent Ansible Playbooks for server provisioning and configuration management, eliminating drift across multiple hosts.
- Wrote Bash scripts for health checks, log aggregation, and backup verification; documented incident runbooks for failure recovery.

Java CI/CD Pipeline on Linux | Jenkins, Maven, Git, Linux, Bash

[GitHub](#)

- Implemented Jenkins CI pipeline for a Java application on Linux, automating source retrieval, unit testing, and Maven artifact generation.
- Documented troubleshooting runbooks and build procedures; maintained post-build incident reports in Confluence-style documentation.

Kubernetes Voting Application Deployment | Kubernetes, Kind, Docker, AWS EC2, Linux, NGINX

[GitHub](#)

- Built and deployed a cloud-native Voting Application on a Kubernetes (Kind) cluster using containerized microservices architecture.
- Managed application lifecycle through Kubernetes Deployments, Services, ReplicaSets, and ConfigMaps, ensuring high availability and service discovery.
- Utilized Docker containers and Kubernetes orchestration for workload management, scaling, pod monitoring, and fault recovery.
- Deployed and administered the solution on AWS EC2 Linux instances, strengthening skills in container orchestration, cloud infrastructure, and DevOps operations.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services

Oracle Cloud Infrastructure 2025 Certified DevOps Professional

Oracle

Microsoft Azure AI Fundamentals

Microsoft

AWS Academy Graduate – Cloud Foundations

Amazon Web Services

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026 (Pursuing)

The NorthCap University, Gurugram, Haryana

Bachelor of Computer Applications (BCA)

2021 – 2024

Gurugram University, Gurugram, Haryana

Senior Secondary (12th), CBSE 2021 • Secondary (10th), CBSE 2019
